

# **Sprint 3 Report**

S.I.D. Technologies | March 11, 2018

Team Members: Eva Lomazov (Project Owner/QA Engineer), Emma Seligson (UI/UX Engineer), Tian Lun Lee (Front-End Developer), Brittany Lei (Back-End Developer), Gerome Deguzman (Database Engineer)

---

This team does not have anything that it would like to change. Nothing has been negatively impacting our work. Our project is basically integrated and though not all of the functions are available, it is a good first version.

Throughout the last sprint we made sure to stick to our Scrum Meeting schedules and increased the number of meetings from 2 online and 1 in person, to 2 online and 2 in person. This helped improve our communication but coordination still needs some work. From conflicting schedules to increasing workloads with finals approaching, meeting up and getting work done in a timely manner was getting more and more difficult. However, our project slowly but surely chugged along to somewhat completion. If we continue this project together, we would consider simplifying user stories completely and shortening the amount of work per sprint. We should also discuss our user stories more thoroughly to make sure we understand the relevancy and requirements of each one, regardless of our roles. This prepares us better from the beginning of the sprint.

Somethings we did well, was our scrum meetings. Online and in person, we kept our scrum meetings short, to the point, and very efficient to allow more time for actual work. They worked well in letting us gauge our progress. Holding meetings after scrum to work together, really helped us as well. Since we are constantly integrating, they helped us find time to work on joint parts of the project.

## **User Stories Completed:**

- As a Project Owner, I want a vector art logo so that it is easily resizable.
- As a Team Member, I want a functional website the users can interact with.
- As a Client, I want the website to have an appealing design so that I can comfortably navigate between tabs.
- As a Scrum Master, I want to be able to edit and view Sprint information on the website's home page.
- As a Team Member, I want to have a Scrum Board that I can modify with user stories and tasks.

## **User Stories Not Completed:**

- As a Client, I want the website to have a search function for easy navigation.

Work completion rate: 2.778 hours/day, 0.27 user stories/day

Total # of user stories completed: 5

Total # of estimated ideal work hours: 50
