

Sprint 2 Report

S.I.D. Technologies | February 21, 2018

Team Members: Eva Lomazov (Project Owner/QA Engineer), Emma Seligson (UI/UX Engineer), Tian Lun Lee (Front-End Developer), Brittany Lei (Back-End Developer), Gerome Deguzman (Database Engineer)

Our team does not have any actions that we would like to change. Nothing that we have been doing so far has been negatively impacting our work. Our project is becoming more substantial, and the integration process has started.

Even though increased meetings have improved our communication, our team can still be more coordinated. In addition to conflicting schedules, increasing workloads in other classes have made meeting up even more difficult. Because of this, it is hard to understand the project as a whole. There is only so much that can be explained through merely words. We intend to start gathering concerns and questions to maximize the efficiency of our limited meetings so that we can understand one another's work and progress. We should also discuss our user stories more thoroughly to make sure we understand the relevancy and requirements of each one, regardless of our roles. This prepares us better from the beginning of the sprint.

Our team should keep holding efficient scrum meetings to quickly get everyone up to date. They work well in letting us gauge our progress. We should also keep holding meetings after the scrum meetings if there are any details that we would like to elaborate on for respective parts of the project. It is a good time to explain and demonstrate things in person since our schedules prevent us from meeting up in person as often as we would like to.

User Stories Completed:

- As a Project Owner, I want a logo so that S.I.D. Technologies can be easily recognized by users.
- As a Client, I want the website to have an appealing design so that I can comfortably navigate between tabs.
- As a Client, I want the home page to have information about the current sprint so that I can tell which easily tell which project I am in and what sprint we are on.
- As a Scrum Master, I want to be able to get and write information from and to the Sprint class.

User Stories Not Completed:

- As a Client, I want to be able to get and write information from and to the Client class.

- As a Team Member, I want the Product Backlog to have all User Stories that are not in the current sprint so that I can tell what still needs to be done.
- As a Team Member, I want the Sprint Backlog to have all the User Stories that are in the current sprint.

Work completion rate: 2.95 hours/day, 0.21 user stories/day

Total # of user stories completed: 4

Total # of estimated ideal work hours: 56
