

Sprint 1 Report

S.I.D. Technologies | February 2, 2018

Team Members: Eva Lomazov (Project Owner/QA Engineer), Emma Seligson (UI/UX Engineer), Tian Lun Lee (Front-End Developer), Brittany Lei (Back-End Developer), Gerome Deguzman (Database Engineer)

We don't think our team has any actions we'd like to stop. We've been able to make progress despite changing our project to something more achievable. We have the core pieces of our project; we just need to integrate them, which we'll achieve in Sprint 2.

The team should start being more coordinated. Due to schedule conflicts, unexpected obstacles, and other priorities, our team has struggled to remain all on the same page. Because of this, not all of our concerns relating to the project have been addressed. We intend to make sure all voices are heard during retrospective, and that all concerns are resolved. Another step is to meet more often outside of our scheduled scrum meetings. We should also start assigning more reasonable user stories for the next sprints. We would be able to focus our attention onto a smaller number of user stories to ensure we complete them on time.

The team should keep the scrum meetings the way they're currently held. They are brief and quickly get every member updated on the team's progress.

User Stories Completed:

- As a Client, I want each Team Member to have an Email, Phone Number, Name and Position attached to the account so that I can send them notifications as necessary.
- As a Scrum Master, I want the Sprint Information to be editable so that I can change it with every new sprint.
- As a Project Owner, I would like this to be in the form of a website with all of the necessary tabs outlined in goal#4 so that it can be accessed from anywhere.

User Stories Not Completed:

- As a Client, I want the home page to have information about the current sprint so that I can tell which easily tell which project I am in and what sprint we are on.
- As a Project Owner, I want a logo so that S.I.D. Technologies can be easily recognized by users.
- As a Project Owner, I want a slogan so that S.I.D. Technologies can be easily recognized by users.
- As a Project Owner, I want a Team ID so that I can add my scrum team members to my project.

Work completion rate: 4.7 hours/day, 0.43 user stories/day

Total # of user stories completed: 3

Total # of estimated ideal work hours: 33
